

# Meet the *Best* DOCTORS in Dallas **2005**

## The Best Doctors in Dallas

**HOW WE DID IT:** *D Magazine's* confidential poll was sent to about 6,000 local doctors in several specialties. About 2,000 of those surveyed were general practitioners, internists, and family practice physicians—those who typically make recommendations and referrals. We asked them to name two doctors they would send their patients or loved ones to in each of the 39 specialties. We also made the ballot available online at [www.dmagazine.com](http://www.dmagazine.com) so doctors not included in our polling could vote. Only those with a valid Texas medical license were eligible. An outside marketing firm tallied the results, and a panel of esteemed local physicians reviewed the list prior to publication. This list is designed with the patient in mind; therefore, under the guidance of the panel, we did not include specialties in which the patient has little or no say, such as anesthesiology and pathology. Nor did we include pediatrics, which is vast enough to warrant its own feature story (last published in July 2004). We also admit that these specialties are broad in some instances. This list is extensive but by no means inclusive: if you don't see your doctor on the list, and he or she is someone you like and trust, you should stick with him or her.

### Jeffrey Whitman, M.D.

SPECIALTY: LASIK SURGERY

Striving to bring the best vision possible to Dallas, Dr. Jeffrey Whitman began practicing in 1985. He is the past president of the Dallas Academy of Ophthalmology and serves on the board of directors of the American College of Eye Surgeons. He is board certified in ophthalmology by the American Board of Ophthalmology and is board certified specifically in LASIK by the American Board of Eye Surgeons.

Dr. Whitman is happily married and the proud father of three beautiful daughters. He has been listed as a *D Magazine* Best Doctor in Dallas for the past four years in the Ophthalmology/LASIK category.

Key-Whitman Eye Center, which began

servicing Dallas-Fort Worth more than 40 years ago, offers a full range of services in three convenient locations.

- Comprehensive and diagnostic examinations
- LASIK™ using Bausch and Lomb's Zywave® customized wavefront technology and Blade-free IntraLase
- Crystallens® and ReSTOR® lens implants used to help patients see without glasses for distance, intermediate and near
- Safe Touch Cataract Surgery™—no shots, stitches or patches
- Glaucoma management and surgery including the SLT— a new treatment that may eliminate or reduce the need for expensive eye drops
- Treatment and surgery for retinal disease

**EDUCATION:**

B.S., highest honors, SMU; M.D., University of Texas Southwestern Medical School
