

Jeffrey Whitman, M.D.

LASIK/CRYSTALENS, ReSTOR, ReZOOM, AND COMPREHENSIVE EYE CARE

Under the direction of president and chief surgeon Jeffrey Whitman, M.D., the Key-Whitman Eye Center has been recognized as a leading eye-care facility for more than 45 years. A full range of progressive ophthalmic services are facilitated by an extraordinary group of experienced ophthalmologists who are Board Certified by the American Board of Ophthalmology. Using a combination of Wavefront analysis and treatment with the all-laser, blade-free Intralase, the Key-Whitman team has improved the precision and predictability of LASIK surgery. The doctors are among a few select surgeons in North Texas credentialed in the use of the crystalens[®], ReSTOR[®], and

ReZOOM[®] intraocular implants which provide far, intermediate, and close-up continuous vision. Treatment for cataracts, glaucoma, and corneal disease as well as routine eye care is offered by the center.

Dr. Whitman, a recipient of the American Medical Association Physician's Recognition Award, is the current president-elect of the American College of Eye Surgeons, and he was recognized by *D Magazine's* Best Doctors peer review as one of Dallas' best in 2002, 2003, 2004, 2005, and 2006.
